THE ADVENTURE:
Imagine that you have arrived in a new environment. Animals use their senses to gather information that helps them survive in the wild. How will you find out more about your new surroundings? Humans can use their senses of sight, touch, hearing, smell and taste to explore their environment.
Choose from the Five Senses adventures to explore how you can use your five senses to observe the world around you.

PLAN:
• Do you want to do this adventure indoors, outdoors or at camp?
• What are your five senses?
• What can we do with our five senses?
• How many stations will you have? How many Beaver Scouts can be at each station at one time?
• How will you make your groups?

DO:
• Explore your five senses using each of the Five Senses Trail Cards!

REVIEW:
Use these Review questions after you have visited all of the stations.
• What do you know now that you did not know before?
• How can you use your senses to explore the world around you?
• How did you work together to explore your senses?
• How would you explain what you observed to someone who is not there?
• What did you like about this adventure? What did you not like? How would you do this adventure differently?
• What elements of STEM were in this adventure? Science? Technology?Engineering?Mathematics?

Imagine that you have arrived in a new environment. Animals use their senses to gather information that helps them survive in the wild. How will you find out more about your new surroundings? Humans can use their senses of sight, touch, hearing, smell and taste to explore their environment.
