THE ADVENTURE:
When we walk in the forest, we hear so many different sounds. Our ears are always on. But how do we tell what sound is what in a forest? Is it a bird? Is it an animal? Is it the leaves of a tree? What do your ears tell you?

In this adventure, pay attention to what your ears tell you. Can you guess what something is if you can hear it but cannot see it? Keep track of which sounds you are able to guess right.

PLAN:
• Do you want to do this adventure indoors, outdoors or at camp?
• Who will get the plastic jars ready for this adventure?
• What sorts of objects will you put in the plastic jars?

DO:
• In your Lodge, pass around the plastic jars.
• Carefully shake each jar, then try and guess what objects are inside each jar.
• What sounds do the different objects make? What clues does this give you about the object?

REVIEW:
• What do you know now that you did not know before?
• How were the sounds the same? How were they different?
• How did you work together to explore what you were hearing?
Use your Five Senses:

WHAT'S THAT SOUND?

MATERIALS:
- Plastic jars (in kit)
- Things to put in the plastic jars (in kit)

ONLINE RESOURCES:

SAFETY TIP:
- Sometimes animals make noises to tell us to stay away or we may get hurt. Do you know what a nest of hornets sounds like? How about a massassauga rattlesnake?
