

**Plan:**

- When and where will you share this outdoor Adventure?
- What is your Crew's budget?
- How can you research likely accidents or disasters?

**Do:**

- Enjoy your outdoor Adventure while learning how to better prepare for future great, safe Scouting Adventures!

**Review:**

- What do you know now that you did not know before?
- What scenarios was your Crew unprepared for?
- How realistic were the proposed scenarios?
- How has this experience changed how you will prepare for future outdoor Adventures?
- What skills and courses might you want to make part of upcoming Crew training?
- What would you do differently next time? How can you build on this experience?

It starts with Scouts.

**Safety note:**

Remember, the accident scenarios the Rovers in your Crew throw at one another are just that—imagined scenarios. Keep this outdoor Adventure safe, and the accidents hypothetical.

Environment &amp; Outdoors

**The Adventure:**

Plan an outdoor Adventure in which everything that can go wrong does go wrong.

Wait. What?

Take turns on your next outdoor Adventure taking breaks from what you're doing to discuss potential accident scenarios and how you would respond as a group to the situation.

This doesn't mean that your Crew should not prepare responsibly for the Adventure. However, even a well-planned outdoor Adventure might suffer an accident. By considering possible accidents or dangerous circumstances while actually out on an Adventure, your Crew can do an even better job of performing Risk Assessment Profiles (RAP) for future Adventures.
