

**Plan:**

- Where might you perform some trail maintenance?
- What skills and equipment do you need to do a good job?
- Will performing maintenance be part of a short or long hike, or will it be its own adventure?
- Survey the trail ahead of your work day, if possible. Consider what maintenance is required: litter pick-up, sign painting, bridge repair, clearing overgrowth, etc.

**Do:**

- Take part in a successful trail rehabilitation.

**Review:**

- What do you know now that you did not know before?
- How did your team get along?
- What problems did you encounter, and what did you do to solve these problems?
- What would you do differently next time?
- Can you adopt this trail on a long-term basis?

**Safety note:**

- What do you need to remember about working with sharp tools?
- What hazardous plants and animals might you encounter, and how should you react?
- What safety gear should you bring?

RIDEAU TRAIL  
Citizenship

**The Adventure:**

Hiking is always a great Scouting adventure. While it's sometimes fun to explore off the beaten path, most of us appreciate a good hiking trail—and all the work that's gone into making and maintaining it.

Trails don't take care of themselves. You can help others to enjoy a hike by performing trail maintenance at your Scout Camp, a park or conservation area. This can be a great linking activity with a Venturer Company.

S-15

It starts with Scouts.
