

### Plan:

- Can you think of any shorelines that could benefit from your Expedition Team's work?
- When will your cleanup take place?
- What equipment do you need?
- How about taking photos of the oddest things found and sharing stories afterward?

### Do:

- Get out and clean a shoreline!

### Review:

- What do you know now that you did not know before?
- How did you feel before, during and after this experience?
- How did your Expedition Team manage this project?
- What problems did you encounter, and how did you solve these problems?
- Did you encounter as much trash as you expected? Why do you think this was the case?
- What else can you do to improve the shoreline?

### Safety note:

While much of a shoreline cleanup will take place on dry land, it's important to keep in mind that water poses certain hazards. In terms of safety, prepare for this adventure as you would any other water-based outing.

It starts with Scouts.

## Shoreline Cleanup

## Citizenship

### The Adventure:

Nobody likes to discover a mess when they head to the beach or get out paddling.

Why not make a difference for others by doing a little service work for a waterfront in your community?

Form an Expedition Team to organize a shoreline cleanup. This may be a more challenging project than picking up litter in the park or along a roadside. Depending on the nature of the shoreline, you may have to plan on getting out in canoes and pulling on hip-waders.

This can be a great linking activity with a Scout Troop or Rover Crew.
