

Plan:

- Where would you like to put your sign? Whose permission do you need to have?
- What theme will your sign have?
- How can you collaborate on a design? Will you sketch things out by hand, or is there software you can use?
- Are there experts you can consult for this project?
- What is your budget?
- What materials and tools do you need? What materials will make the sign longer lasting?

Do:

- Put your Company's stamp on your meeting hall or local Scout Camp. Share your project with others online.

Safety Note:

- What safety equipment and procedures do you need to be familiar with for the tools you're using?
- How can you stay safe when using paint or varnish?

Review:

- What do you know now that you did not know before?
- How did you feel before, during and after this adventure?
- What problems did you encounter, and how did you work as a team to overcome them?
- Imagine you're looking at your project for the first time. What do you think others will think of what you've done?
- What would you do differently in the future?

It starts with Scouts.

Welcome Sign

Creative Expression

**The Adventure:**

Design and construct a welcome sign for your Scout Camp or meeting hall.

The sign can both reflect and enhance the place's Scouting character, and it will be a fantastic legacy for your Company.

Come up with a plan as a group, then have fun making your vision a reality!
