

Plan:

- Where will you travel to plant trees?
- How will you find land and trees to plant?
- With what organization, if any, will you partner?
- How can you engage local Scouts in your service project?
- How much will this adventure cost? How will you fundraise?

Do:

- Plant trees in a foreign country to benefit the whole world!

Review:

- What do you know now that you did not know before?
- What went to plan?
- What obstacles did you encounter, and how did you overcome them?
- How did you work as a team on this adventure?
- What was the local response to your service project?
- What would you do differently next time?

Safety Note:

- What precautions do you need to take when traveling abroad?
- How can you research your destination?

- [5000 Mangrove Seedlings, 2 Scout Groups, 1 Environment](#)
- [How to Plant a Mangrove Tree](#)
- [Scout Popcorn](#)

It starts with Scouts.

Plant Trees Abroad

Environment & Outdoors

The Adventure:

Climate change is a problem that affects the entire planet, and planting trees is one way to reduce its impact. It doesn't matter where trees are planted. Every new tree that's given an opportunity to grow is part of the solution.

There are benefits to planting trees beyond fighting climate change, of course. Depending on where they're planted, trees can help to combat erosion, improve air quality and provide habitat to local animals. There are many human benefits to trees, too. Trees are a valuable resource that, when properly managed, can transform local economies.

If your Crew is thinking about an international service project, consider planting trees! The trees you plant can offset the carbon footprint of your trip, and they can change a community for the better.
