

SC YLT

Dynamic Duos

The Adventure:

As a Lodge, come up with an obstacle course that all the Beaver Scouts in the Colony can have a go at.

The obstacle course should be done in pairs. Each pair needs to make it through the obstacle course while keeping a beach ball off the ground.

Sounds too easy? Okay, then! Every pair needs to make it through the obstacle course while keeping a beach ball off the ground...without using their hands!

The key to this challenge will be for each pair to talk to one another while doing the obstacle course. That way, each pair can work as a good team.

Safety Note:

- Your obstacle course should not be too tricky. The beach ball will make it hard enough.
- What safety gear should you have? Helmets? Crash pads?

MALAK'S MAPLE

Leadership: Teamwork

Plan:

- Where will you set up your obstacle course?
- What obstacles will you use?
- What stuff do you need for this adventure? Who will find it?

Do:

- In pairs, try to go through the course. Remember to keep the beach ball off the ground—without using your hands!
- If you make it through the course with one friend, try again with someone else.

Review:

- What do you know now that you did not know before?
- Why was it hard to get through the obstacle course?
- What did you and your partner do to be successful?
- What would you change next time?
