

SC YLT Lego Calendar

The Adventure:

Every fall, Beavers plan the adventures they will share. This is why you have your Pond Map. It is a way to think about the adventures you plan. There are different kinds of adventures, and they belong on different places on the map.

To make sure you are going to all of the places around the Pond, make a calendar out of Lego bricks! You will have four Lego sheets—one for each season. It is a good idea to make these different colours.

Now think about the adventures you will share this year. For each adventure, put a Lego brick on the sheet for that season. The Lego bricks you add will stand for the places on your Pond Map. Choose a colour for each place on your map. For example, Rusty's Meadow is the place for Active & Healthy Living. If you would like to go skating in the winter, put an orange Lego brick on the Lego sheet for winter. Why orange? To match Rusty's orange fur, of course!

Safety Note:

WARNING: CHOKING HAZARD. Toy contains small parts. Not suitable for children under 3 years.

MALAK'S MAPLE

Leadership: Plan-Do-Review

Plan:

- What materials do you need for this activity?
- How will you match colours to the places on your Pond Map?
- What colours of Lego sheets will you use for each season?
- Do you already have a list of adventures you will share this year in Beavers, or will you make up new adventures for this activity?

Do:

- Create a Lego calendar!

Review:

- What do you know now that you did not know before?
- What was your favourite part of this activity?
- How closely did your seasons match?
- What other ways can you use Lego to help with planning, doing and reviewing a project or adventure?
