

SCOUTS YLT

The Floor is Lava!

MALAK'S MAPLE

Leadership: Teamwork

The Adventure:

The floor becomes lava and you have to get your team to the island without touching the lava!

Start at one end of the room or outdoor area with large pieces of cardboard or foam mats to stand on. But you can't move the mats while you're standing on them, so you'll have to jump onto another Beaver's mat to move your own forward, and work together to get everyone across the lava to safety.

Once everyone is on the island, the lava tide changes and you have to get across to the other side again, but this time you lose a couple of your mats that sink in the lava. Work together to get everyone across even when not everyone has a mat.

Safety Note:

Be careful when jumping onto each others' mats not to run into each other.

Plan:

- Make sure everyone has one mat.
- Decide where the island and lava is before the game starts.

Do:

- Have fun!

Review:

- What do you know now that you did not know before?
- What was hard about getting to the island?
- What made it easier?
- How would it change if you didn't share your mat with another Beaver? Would you still be able to get to the island?
