The Adventure:
How do you respond to a tricky situation? In Lairs, talk through some scenarios provided by your facilitator and try to figure out the best thing to do. The scenarios your facilitator gives your Lair will be realistic, and deciding how to react won’t be easy! Present your scenarios and decisions to the rest of the group.

Safety Note:
Remember: safety should always come first when deciding how to react in your scenarios!

Plan:
- What risks do you need to think about?
- Why are you making this decision?
- How will this lead to a safe experience for all?

Do:
- Make your presentation to the group!

Review:
- What do you know now that you did not know before?
- What is the most important thing to think about when making decisions?
- How can you be an include other people when making decisions?
- Why can it be a good idea to make the same decisions you have made before?
- What things should you keep in mind when you think about safety?
