## Make a Budget

## RED COAT TRAIL

### Leadership: Plan-Do-Review

#### The Adventure:

Create a budget for a hypothetical camp that you are planning. Start by dividing your group into Patrols. Think about food, equipment and activities; list the expenses that will be part of your adventure, and research how much they will cost (your facilitator may provide guidelines to help with this). How do your plans match your budget? Make some compromises to come up with an adventure your Patrol is happy with.

#### Safety Note:

Ensure that everyone on your team is included and that you are planning in a safe environment.

#### Plan:

- What are the priorities in your budget?
- How will you decided where to spend funds?

#### Do:

- Create your budget. Do your best to make a budget that allows for as great an adventure as your money allows!

#### Review:

- What do you know now that you did not know before?
- What was hard about making decisions?
- How did you manage to stay within your budget?
- What did you make a priority in your budget?
- What would you do differently if you did this activity again?
